This kitchen island is a perfect example of the design philosophy of the brand, which is to create a space that is both functional and aesthetically pleasing. The island is made of a solid piece of wood, which is a natural choice for a kitchen island. The island is also equipped with a sink and a stove, making it a complete kitchen unit. The island is surrounded by a wooden countertop, which is a perfect match for the island. The island is also equipped with a large black pendant light, which is a perfect match for the island. The island is a perfect example of the design philosophy of the brand, which is to create a space that is both functional and aesthetically pleasing.

TWENTY

La collezione, già proposta in Kerlite, vetro, Corian®, pietra piacentina e legno, si arricchisce della versione con finitura in resina di cemento grigio, cendre, antracite o nero, totalmente priva di giunti o fessure. Fulcro della cucina è l'isola monoblocco con scanalature orizzontali: attrezzata con comparti-dispensa nella parte inferiore, dispone di un'ampia superficie per la preparazione dei cibi, di una vasca capiente in granito levigato opaco nero e di una penisola di lavoro (o per light lunch) in legno massello sabbato da mm 80 di spessore, che rompe la continuità del cemento. Gli elettrodomestici sono nascosti nelle armadiature: i forni in linea in un pensile con apertura verticale manuale o elettrica, il frigo nelle colonne a battente verticali.

This collection, already available in Kerlite, glass, Corian®, piacentina stone and wood, now also comes in a version with cement resin finish in grey, cendre, anthracite or black, and is totally seamless. The main focus of the kitchen is the monobloc island with horizontal grooves: fitted with larder compartments below, it has a generous food preparation surface, a large tub made of smooth matt black granite and a pier unit providing an additional work surface or handy snack bar in solid sanded wood (thickness 80 cm), a visual feature that relieves the continuity of the cement surfaces. The electrical appliances are concealed inside the cabinetry: in-line ovens in a wall unit with manual or electrical vertical opening, the refrigerator in vertically hinged tall units.
